16. Abstracts

Subject headings extracted from scientific activities supported by the research grants program of the Public Health Service in all areas of medical and health-related sciences during fiscal year 1965 are arranged alphabetically. Under each subject heading in the index, the project number is followed by a subset of terms used to describe more fully the main subject heading's relationship to the source material.

Sold only in sets of 2 volumes.

Foreword

A major portion of the national expenditure for health-related research is administered by the Public Health Service, Department of Health, Education, and Welfare, through grant-in-aid programs, of which the research grants program is the largest. This fifth edition of the *Research Grants Index* indexes more than 17,000 Public Health Service research projects that were active in fiscal year 1965.

The *Index* is issued each year. It has served as a reference source for scientists and for administrators of scientific programs and others who may seek information on what medical research is in progress on any subject of interest and where it is being done. It is believed that the yearly issue can be particularly useful to scientists who would like to communicate with others working on the same or closely related problems.

Introduction

Research Grants Index, Fiscal Year 1965

The *Research Grants Index* is published annually for distribution to scientists and administrative personnel in the Federal Government and to Public Health Service grantee institutions. It is designed to disseminate information about current scientific activities supported by the extensive research grants programs of the Public Health Service in all areas of medical and health-related sciences.

The alphabetical arrangement of subject headings in Volume I enables users to refer directly to specific items of research interest. In Volume II the categorization of projects by general research areas may be of interest to users who wish to review broad segments of scientific research.

VOLUME I—SUBJECT HEADINGS

Volume I of the *Research Grants Index* contains approximately 10,000 single or compound subject headings listed alphabetically, of which nearly 5,600 are primary headings and the remainder are cross-references. Approximately 2,200 cross-references are "see" terms which refer to synonymous headings, and about 2,200 are "see under" references.

The "see under" references indicate items appearing as subheadings under a primary subject heading. The heading-subheading device is used for approximately 314 selected groupings, as an alternative to "see also" cross-references, for collection and display of related groups of data. Examples of the types of groupings are: terms which relate to (1) species; e.g., *Agrobacterium*, see under Bacteria; (2) body parts or systems; e.g., *Erythrocytes*, see under Blood cells; (3) biochemicals; e.g., *Adenylosuccinase inhibitors*, see under Enzyme; e.g., inhibitors; and (4) special areas; e.g., *Africans*, see under Ethnic groups. The subheadings (italicized words in foregoing examples) are arranged alphabetically, not in hierarchical order, under the primary subject headings.

Indexing Procedure

The indexers (professional staff members of the Research Documentation Section) analyze PHS applications, progress reports, and summaries to determine the subject headings under which the research project (grant or contract) number is to appear in the *Research Grants Index*. The average number of subject headings chosen to describe a project is 7.2 (range 3 to 25). The selected headings are compared with a master subject heading list (*Medical and Health Related Sciences Thesaurus*, PHS Publ. 1031, revised) to insure conformity with accepted terminology.

Under each subject heading in the *Research Grants Index* the project number is followed by a subset of terms. This subset of terms was taken by the indexer from the total set of terms selected from the source document and coordinated in context in such a way as to describe the main subject heading more fully. With the exceptions noted below under "Limited-Use Subject Headings," all terms selected to describe a document are used both as primary subject headings and also within pertinent subset descriptions. For example, an indexer described project HE-03792 entitled, "Methods of altering circulation to bone," with nine subject headings: "arteriovenous fistula; blood cells . . *erythrocytes;* blood flow; bone marrow; bone; growth; blood vessels restoration; bone . . *femur;*" and "radiolabeled." Under the *Research Grants Index* subject heading "ARTERIOVENOUS FISTULA," appear the following grant number and subset of terms:

HE-03792 Blood flow . . bone marrow . . growth

Under the heading/subheading, "BLOOD CELLS . . *Erythrocytes*," a different subset was selected to accompany the grant number:

HE-03792 Radiolabeled . . bone marrow . . blood flow

The same procedure was used for each of the remaining headings except "radiolabeled."

Limited-Use Subject Headings

The term "radiolabeled" represents a type of indexing heading which is used frequently in subset descriptions but not always documented under the corresponding primary subject heading in the *Index*. This type includes names of animals, laboratory methods, and instruments which are used routinely in experimental research. Documents using these routine methods are recorded in special information files in the Research Documentation Section, however. A complete list of projects in which radiolabeled substances are involved, for example, is available on request from the Section.

A second type of heading frequently used in subset descriptions but not always recorded under the primary subject headings are those which represent general research areas (e.g., metabolism or physiology). Such general area subject headings in Volume I are cross-referenced to the page numbers in Volume II where the research areas are listed. (The General Research Areas are described more fully under Volume II, Appendix II, below.)

In addition to the foregoing, there are a few descriptive words ("derivatives," "experimental"), used to clarify the context of a particular subset, which are never used as subject headings.

Investigators Review Indexing. Before the *Research Grants Index* is published, each of the investigators is asked to review the indexing terms selected to characterize his research. The *Research Grants Index*, therefore, has the advantage of including indexed entries which have been accepted by the investigators doing the work.

Grant and Contract Numbers. As illustrated in the example given under "Indexing Procedure" above, each subset description is preceded by an alpha-numeric Public Health Service number shown in alpha-numeric sequence under the subject headings in Volume I. The "alpha" prefix of the project number, in this case "HE" for "heart," identifies the Institute or Division of the Public Health Service which supported the research. (A complete explanation of the prefixes is given in the "Glossary of Abbreviations.") In Volume II the project numbers, listed in alpha-numeric order, are followed by identifying information which is described in detail below under *Appendix I—Grant Number Listing and Bibliography.*

VOLUME II

An alphabetical index to the subject headings contained in Volume I is included as the first part (green pages) of the second volume. The remainder of Volume II consists of three appendices. Appendix I lists researchers according to Public Health Service project number. Appendix II is an arrangement of projects by general research areas. Appendix III is an alphabetical list of investigators.

Appendix I—Grant Number Listing and Bibliography. In Appendix I, identifying information about grants is listed in project-number sequence according to the Institute or Division which supported the research. Again using project HE-03792 as an illustration, a single complete entry in Appendix I consists of (1) the alpha-numeric identification of any given grant or contract, followed by (2) the abbreviated name of the PHS study section or other advisory group that reviewed and evaluated the project initially; (3) the name and address of the principal investigator; (4) the title of the project, and (5) references to recent articles published as a result of work done under PHS support.

(1)	(2)	(3)
HE-03792-7	SURG	STEIN, Arthur H., Jr., Sch. Med., Washington Univ., St. Louis, Mo. (4) Methods of altering circulation to bone (5) Surg Gynec Obstet 119:535, Sep 64. A method to determine the rate of blood flow in long bones and selected soft tissues.

The research contracts are shown in numerical sequence at the end of each Institute listing, following the research grants.

Journals and other Sources in which PHS Grantee Scientists Publish. More than 25,000 bibliographic references (see (5) in above example) are included in the *Grant Number Listing and Bibliography* section. These articles were extracted from bibliographies, progress reports, or from actual reprints submitted during November 1964–October 1965 by grantees currently receiving PHS support. During the same November 1964–October 1965 period, journal articles were received also from grantees whose PHS-supported research had terminated prior to fiscal year 1965. The latter citations are shown separately (yellow section) following the listing of current projects. There are no other references to these terminated projects in this edition of the *Research Grants Index.*

At the end of Appendix I is a tabulation summarizing the journals and other sources in which the foregoing 25,000 articles were published.

Appendix II—General Research Areas (blue section). Each of the approximately 17,000 projects (indexed under multiple subject headings in Volume I) is assigned to one of 74 general areas listed in Appendix II, Volume II. These general categories are the various scientific fields represented by the PHS advisory panels which review grant applications for scientific merit. This categorical assignment was made initially by staff members in the Research Grants Review Branch of the Division of Research Grants. In the project HE-03792 described previously, the abbreviated symbol "SURG" indicates that project HE-03792 was reviewed by the Surgery Study Section. Under the subject heading "Surgery" in Volume I, a cross-reference is given to Volume II, page 2299, to indicate that grants in the general research area of "Surgery" appear in the General Research Areas listing in Volume II, Appendix II.

Each grant number in Appendix II is followed by the name and address of the investigator and the several subject headings under which the individual project appears in Volume I. No contracts appear in the General

Research Areas listing since review of research contracts differs from that of research grants. The contracts, however, are grouped together and shown at the end of the General Research Areas appendix.

Appendix III—Alphabetical Listing of Project Investigators. The final (white) section, Appendix III, lists alphabetically the names of the project investigators. Only the name of the investigator who has primary responsibility for the research is shown.

Additional Information

Scientists associated with research institutions or officials with governmental or private research grants programs may obtain descriptive summaries of any of the grants listed in the *Research Grants Index* by requesting them from the Science Information Exchange, Madison National Bank Building, 1730 M Street NW., Washington, D.C. Requests for reprints of publications or reports of progress, however, should be addressed directly to the individual investigator at the address listed in Appendix I of this *Index*.

Other requests for information should be addressed to the Research Documentation Section, Division of Research Grants, National Institutes of Health, Bethesda, Md., 20014.

GLOSSARY OF ABBREVIATIONS

Grant No. The grant number is composed of code letters and a number. The code letters represent the Institute or Division supporting the project. In the *Index* portion, Volume I, and in Appendices I and II of Volume II, projects (grants) are arranged alphabetically by Institute code letters and numerically within each Institute grouping. Code letters for the various Institutes and Divisions are as follows:

NATIONAL INSTITUTES OF HEALTH

AI—Allergy and Infectious Diseases
AM—Arthritis and Metabolic Diseases
CA—Cancer
DBS—Division of Biologics Standards
DE—Dental
DRG—Division of Research Grants
DRS—Division of Research Services
FR—Division of Research Facilities and Resources
GM—General Medical Sciences
HD—Child Health and Human Development
HE—Heart
MH—Mental Health
NB—Neurological Diseases and Blindness
OD—Office of the Director
OM—Mental Health (special series)
TW—Office of International Research

BUREAU OF STATE SERVICES

Community Health

AC—Accident Prevention
CC—Communicable Disease Center
CD—Chronic Diseases
CH—Community Health Services
DH—Dental Health
HM—Hospital and Medical Facilities
NU—Nursing

Environmental Health

AP—Air Pollution
EF—Environmental Engineering and Food Protection
ES—Environmental Health Sciences
OH—Occupational Health
RH—Radiological Health
WP—Water Supply and Pollution Control

NATIONAL LIBRARY OF MEDICINE

LM—National Library of Medicine

In Appendices I and III in Volume II the number of years in which a grant has been continued is shown as that part of the project number following a hyphen. Thus grant HE–09269–1 is a project in its first year of support, and HE–05670–4 is in its fourth year. The continuation years are omitted from the grant numbers listed in Volume I and from those in Appendix II, Volume II.

Contracts. Research contracts are identified by the appropriate Institute or Division code letters followed by a five or six digit number. The first two digits indicate the year in which the contract initially was awarded, the remaining digits following the hyphen being the contract identification number. In the *Index* portion and in Appendices I and II research contracts follow entries for grants for each Institute or Division.

Review Groups. Study Sections or Committees giving technical review to applications are abbreviated in Appendix I as shown below.

AFY	Applied Physiology
AI	Allergy and Immunology
AID	Allergy and Infectious Diseases Training Committee
AIP	Allergy and Infectious Diseases Program-Project Committee
AMK	Research Career Award Training Committee
AMP	Arthritis and Metabolic Diseases Program-Project Committee

(contd)

BACTERIA

Bacillus subtilis *(contd)*

GM-10461	Deoxyribonucleic acid..genetic mapping ..proteases..amino acid sequence ..molecular weight..enzymes subtrates
GM-10739	Mutations..proteases..chemical structure--biological activity ..genetic mapping
GM-10793	Proteins..chemical structure
GM-10982	Genetics..enzymes..transformation
GM-11197	Mutation..transformation..copper.. deoxyribonucleic acid..electron microscopy
GM-11485	Cordycepin..growth inhibitors.. nucleic acids
GM-11832	Deoxynucleic acid..transformation.. proteins..binding..chemical structure--biological activity
GM-11916	Deoxyribonucleic acid..isolation.. methodology..physical chemistry.. genetic mapping
GM-11946	Deoxyribonucleic acid..transformation ..enzymes
GM-11948	Mutations..proteases..isolation-purification..transformation.. deoxyribonucleic acid..research programs
GM-12078	Isolation-purification..messenger ribonucleic acid..column chromatography..chemical structure--biological activity.. genetics
GM-12420	Mutants..nucleotides..purines.. metabolism..Bacillus subtilis.. neutrophil leukocytes..rabbits
GM-12573	Deoxyribonucleic acid..isolation--purification..transformation.. actinomycin
GM-12956	Genetic strains..transformation.. deoxyribonucleic acid.. binding..recombination
GM-13064	Mutants..Krebs cycle..reaction mechanisms..growth, microorganisms..spores..gene expression
GM-13155	Chromosome replication..deoxyribonucleic acid..in vivo
GM-13236	Auxotrophs..potassium..proteins.. biosynthesis
HD-01229	Transformation..deoxyribonucleic acid
HD-01331	Mutagens..genetics
HD-01827	Auxotrophs..transformation..recombination..genetic coding..enzymes
MH-10280	Metalloenzymes..proteases..isolation.. enzyme mechanisms
NB-05290	Microbial cultures..inhibition assay ..methodology..metabolic diseases inborn

Bacterionema

DE-00370	Mouth..metabolism..anaerobes.. aerobes

Bacterium cadavaris

GM-11016	Deaminases..isolation--purification ..aspartase..β--methylaspartase.. ..D--amino acid oxidase..microbial culture

Bacteroides melaninogenicus

DE-01471	Dental caries..germ--free..rats.. mice

Bacteroids

AI-00961	Growth factors..insects..symbiosis

Beggiatoa

WP-00443	Carbon dioxide fixation..oxidation.. sulfur compounds..enzymes.. taxonomy..microbial culture

Bordetella bronchiseptica

AI-05689	Turbinate atrophy..diagnostic tests.. serology..immunology..swine

Bordetella pertussis

AI-04195	Antigens..pertussis vaccine.. methodology
AI-04219	Growth..virulence..genetics..metabolism..physiology
AI-04249	Antigens..potency loss
AI-05886	Endotoxins..fractionation..anaphylaxis..mice
AI-06116	Isolation-purification..lymphocyte stimulating factor..reaction mechanisms..lymphocytes..mice
AI-06348	Fractionation..cell wall..antigens.. antigenic stability..cation
CC-00114	Endotoxins..fractionation.. anaphylaxis..mice

Brucella

AI-01247	Cell components..antigens
AI-01302	Growth factors..growth inhibitors.. monocytes..animal
AI-02471	Bacteriolysis..properdin..complement..blocking antibodies.. animals..human
AI-03368	Cell wall..immunity..serum..cattle
AI-04638	Genetic strains..tissue respiration ..metabolism..mutations.. vectors
AI-05370	Antigen-antibody reactions..cell wall..protoplasm..acid-fast bacteria..immunological tests.. animal
AI-06264	Interferon..biosynthesis.. chick embryo..mouse embryo
CA-04786	Deoxyribonucleic acid..antigens.. isolation-purification.. transformation

Brucella abortus

AI-03561	Brucella vaccines..cell culture.. immunofluorescence..guinea pigs ..mice
AI-06033	Antigen--antibody reactions..experimental pathology..host--parasite ..antibodies..milk..cattle
AI-06161	Virulence, microorganisms..growth, microorganisms..host--parasite.. genetics..guinea pigs

Calymmatobacterium granulomatis

AI-01239	Granuloma inguinale..epidemiology ..feces..growth factors
AI-05805	Growth, microorganisms..antigen--antibody reactions..cytopathogenic effect, bacterial..isolation--purification..bacterial capsule ..etiology..granuloma inguinale

Cellvibrio

AI-04555	Mutations..biosynthesis..fluorescence ..pigments

Chlorobium thiosulfatophilum

AI-04888	Photosynthesis..pigments..chemical structure
AI-06447	Amino acids..biosynthesis..enzyme mechanisms..acetates..precursors
GM-12202	Photochemistry..electron transport.. bioenergetics..research programs

Chromatium

AI-06733	Phosphoribulokinase..carbon dioxide fixation..carboxydismutase.. phosphoribulokinase..isolation
AM-09160	5--Aminolevulate synthetase.. enzyme mechanisms..porphyrins.. biosynthesis..Chromatium..liver
EF-00357	Herbicides..metabolism..photosynthesis
GM-12202	Photochemistry..electron transport.. bioenergetics..research programs
WP-00727	Growth, microorganisms..ecology, microorganisms..stabilization ponds..odors..sewage treatment

Chromogenic bacteria

GM-12202	Photochemistry..electron transport.. bioenergetics..research programs

Clostridium

AI-00563	Glutamate..isomerase..biosynthesis
AI-04865	Metabolism..nitrogen compounds ..electron transport..intermediates..enzymes..isolation-purification
AI-04958	Cell differentiation..amino acid.. metabolism..genetic strains.. methodology..taxonomy
AI-05079	Lipids..cell components..chemical structure--biological activity ..metabolism
AI-05170	Vagina..cervis..isolation-purification.. immunofluorescence..bacterial diseases..microbial culture..plate counting methods..anaerobes
AI-05741	Taxonomy..cell culture collections
AI-06165	Clostridium sporogenes..spores.. heat lability..kinetics.. hydrogen--ion concentration.. temperature..model system
AI-06192	Sporogenesis..microbial culture.. nutrients..biosynthesis.. dipicolinic acid
AM-02109	Purine..fermentation
AM-06717	Thiamine pyrophosphate..glyoxalate.. metabolism..phosphoroclastic cleavage..reaction mechanisms
AM-07954	Metabolism..ethylene glycol..diol dehydratase..cell--free systems.. microbial culture..hydrogen transport
AM-08845	Purines..metabolism..ferredoxin.. formate: tetrahydrofolate ligase (ADP)..macromolecules..research programs
AM-09327	Clostridium pasteurianum..ferredoxin ..related compounds..isolation
EF-00135	Life cycle..reproduction, microorganisms..sporogenesis..chemically defined culture media
GM-08001	Biosynthesis..messenger ribonucleic acid
GM-11820	Clostridium sticklandii..biological models

Clostridium acidi-urici

AM-05530	Pyruvate..metabolism..radiolabeled carbon

Clostridium botulinum

See also Botulinus toxin

EF-00161	Milk..growth, microorganisms..toxins ..temperature
EF-00361	Toxins..precursors..isolation--purification..chromatography
EF-00517	Spores..heat..radiation effects.. reaction mechanisms..sterilization
EF-00632	Clostridium botulinum, type E..spores ..heat lability..heat stability ..microbial culture..methodology
EF-00656	Type E..growth, microorganisms.. glycolytic pathways..amino acids..metabolism..physiology
EF-00677	Ecology, microorganisms..soil pollution..soil sampling.. water pollution..inland fresh waters..lakes

Clostridium butyricum

AI-00658	Antigens..toxins..rabbits
AI-06663	Fatty acids..cyclopropane..biosynthesis..metabolism..enzyme mechanisms
GM-04712	Acetoacetate decarboxylase.. Schiff bases..reduction
GM-11765	Extracts..purification..lactates.. racemization..enzyme mechanisms

Clostridium cadaveris

AI-05830	Enzymes..isolation-purification.. antigen-antibody reactions.. species specificity

Clostridium cylindrosporum

AM-02109	Purine..fermentation
AM-07140	Formyltetrahydrofolate ligase (ADP).. isolation-purification..DEAE cellulose chromatography..proteins ..molecular structure..enzyme mechanisms

Clostridium histolyticum

AM-00779	Collagenase..isolation-purification ..enzyme mechanisms..molecular structure..collagen
AM-03172	Proteases..collagen..peptides.. collagenase..collagen..peptides ..isolation..enzyme mechanisms

Clostridium nigrificans

AI-04672 Electron transport..enzymes..sulfates..metabolism
AI-04673 Reduction..sulfates..enzymes..intermediates..isolation-purification

Clostridium perfringens

EF-00131 Food poisoning..food contamination
HD-00052 Glycosidases..isolation--purification..protein--bound carbohydrates..cell wall
HD-00859 Toxins..intestinal obstruction..dogs
HD-01250 Aldolases..metalloenzymes..chemical structure..phylogeny

Clostridium roseum

AI-03590 Spores..fatty acids..nutrients

Clostridium thermoaceticum

GM-11839 Carbon dioxide fixation..acetates

Corynebacterium

AI-01144 Carbohydrates..metabolism..radiorespirometry
AI-02838 Wax D..phospholipids..glycolipids..chemical structure--biological activity..immunology
AI-02924 Species..taxonomy..physiology
AI-05949 Somatic antigens..Mycobacterium..antibodies..immunity..diphtheria
AI-06249 Branched--chain acids..fatty acids..wax D..adjuvants..tuberculin tests
DE-02234 Dental calculus..etiology..growth, microorganisms..infant human..immunofluorescence..serology
GM-12643 Pigments
GM-12646 Virus inhibitors..isolation--purification..reaction mechanisms..virus replication

Corynebacterium diphtheriae

AI-01071 Virulence, microorganisms..toxins..lysogeny..genetics..biochemistry..physiology
AI-04942 Diagnostic tests..immunofluorescence..infectious diseases..carriers..throat washings..clinical study

Desulfovibrio desulfuricans

AI-04673 Reduction..sulfates..enzymes..intermediates..isolation-purification
AI-04882 Biosynthesis..antimercurials..mixed populations..Pseudomonas aeruginosa..microbial synergism..microbial culture..chemical structure--biological activity
GM-12198 Hydrogen..photosynthesis..hydrogenases

Diplococcus pneumoniae

AI-00727 Streptococcus..transformation..recombination..genetic mapping..deoxyribonucleic acid..drugs resistance
AI-02334 Immunity..serum..chemical structure--biological activity..infectious diseases..swine
AI-03170 Mutations..folic acid..biosynthesis..drugs resistance..sulfonamides
AI-03713 Streptococcus..transformation..genetics..deoxyribonucleic acid
AI-04360 Biosynthesis..pneumocines..chemical structure--biological activity..genetics
AI-05100 Pneumonia..research programs..cell capsule..transformation..M protein
AI-05173 Cell capsule..transformation..deoxyribonucleic acid..streptomycin..genetic strains
AI-05388 Transformation..recombination..genome..deoxyribonucleic acid..biosynthesis..molecular structure
AI-05474 Antigens..polysaccharides..ferritin labeled antibody technique
AI-05568 Drugs resistance, 2,6--dimethoxyphenyl penicillin..mutations..genetic mapping..transformation..reaction mechanisms..genetics
AI-05634 Carbohydrates..metabolism
AI-06021 Fractionation..immunology..lipids..binding..C reactive proteins..isolation-purification
AI-06181 Etiology..pharyngitis..children..statistics..survey
AI-06346 Hemagglutinins..erythrocytes
AI-06359 Antigens..immunological paralysis..antibodies..biosynthesis..polysaccharides
AI-06610 Polysaccharides..antigens..antibody combining sites..methodology..immune sera..horses
AM-09273 Bacillus subtilis..deoxyribonucleic acid..transformation
CA-03192 Drugs resistance..chromosomes..research programs
CA-06343 Deoxyribonucleic acid..biosynthesis..bacterial respiration..virulence, microorgansism..population dynamics, cell
CA-07179 Polysaccharides..immunology..antibodies..Hodgkin's disease..precipitin technique..clinical study
HE-02054 Body fluids..adrenal cortex hormones..electrolytes..radiolabeled

(contd)

BLOOD CELLS

Erythrocytes (contd)

HD-01461	Cell age..enzymes..newborn..premature infants..clinical study
HD-01519	Chloramphenicol..toxicology..therapy evaluation..phenylalanine..drugs interaction..children..animals
HE-01069	Enzymes..biochemistry..blood disorders..glycolysis
HE-01263	Heat..hemolysis..electrophoresis
HE-01301	Membrane permeability and transport..potassium..sodium..ions..uremia..human
HE-01380	Hemoglobin..newborn
HF-01624	Growth..chromosomes..cytology
HE-01974	Membrane permeability and transport..adenosine triphosphate..active transport..intermediates..crabs..electric eel
HE-02579	Metabolism..organophosphates
HE-02639	Liver circulation..rats
HE-02676	Diet..fats..viscosity..blood
HE-02703	Hormones..stress..cell age
HE-02710	Radiation effects..mercury vapor lamp..clinical study
HE-02803	Biosynthesis..purine nucleotides..pyridine nucleotides..cell age
HE-02907	Phospholipids..isolation..human
HE-02965	Detergents..acanthrocytosis..clinical study
HE-02987	Plasma albumins..kidney function..blood circulation dynamics
HE-03028	Cell age..blood disorders..animals..human
HE-03169	Carbonic anhydrase..human
HE-03394	Buoyant density..density gradient ultracentrifugation
HE-03480	Survey..Hawaii
HE-03509	Hemolysis..thrombocytes..human
HE-03792	Radiolabeled..bone marrow..blood flow
HE-03877	Glycine..5-aminolevulinate hydrolyases..radiolabeled carbon
HE-04108	Hemoglobin..erythrocytes..stop flow technique..human
HE-04386	Nutrition..polyenes..fatty acids
HE-04516	Glutathione reductase..diabetes
HE-04573	Peripheral vascular system..blood volume
HE-04586	Pentoses..biosynthesis..favism
HE-04909	Suspensions..stabilizers..liver function..hemagglutination..Staphylococcus aureus
HE-04965	Thiols..tissue respiration..Bohr effect..radiolabeled carbon..human
HE-05006	Intermediates..metabolism..antibodies..rare blood groups..clinical study
HE-05059	Acid-base equilibrium..single cell analysis..surface properties..clinical study
HE-05071	Antigens..enzymes..isoantibodies..radiolabeled iodine..methodology
HE-05228	Radiolabeled chromium..blood volume..plasma..swine
HE-05305	Metabolism..cell membrane..clinical study
HE-05446	Plasma..blood flow impedance..blood disorders
HE-05448	Aromatic compounds..hemolytic drugs..indicators..glucose--6--phosphate dehydrogenase..glutathione
HE-05557	Blood flow..biological models
HE-05667	Antigens..rats
HE-05732	Viscosity..blood..in vitro
HE-05871	Anaplasma marginale..autoantigens..antibodies..immunofluorescence..fetus..sheep
HE-05911	Polymerization..blood flow
HE-06033	Fibrin..electron microscopy..human
HE-06078	Glutathione..enzymes..cells..metabolism..hemolysis
HE-06108	Lipids..membrane permeability and transport.. fractionation..rabbits
HE-06125	Cell age..carbohydrates..metabolism..hemolytic anemia..human
HE-06142	Blood flow..tissue
HE-06238	Blood circulation dynamics..capillaries..hypothermia..hematology..dogs
HE-06239	Phosphorylation..metabolism..hemolytic anemia..ion exchange chromatography..glucose-6-phosphate dehydrogenase
HE-06241	Cell membrane..bivalent cations..adenosine triphosphatase..glucose-6-phosphate dehydrogenase
HE-06266	Radiolabeled..endotoxins..shock..monkeys
HE-06270	Erythropoiesis..antigen-antibody reactions
HE-06381	Membrane permeability..cation..anion..body fluids
HE-06388	Cations..ion exchange..heart contraction
HE-06423	Plasma..interaction..blood circulation dynamics
HE-06474	Hemolysis..freezing..ice..crystallization..blood preservation
HE-06487	Radiolabeled chromium..capillary beds..adipose tissue..rats
HE-06507	Strongylata..clinical study
HE-06561	Radiolabeled manganese..blood disorders..clinical study
HE-06678	Porphyria..splenectomy..metabolism
HE-06756	Electrophoresis..age..sex difference..blood groups..human
HE-06787	Hemoglobin..age..oxygen tension..heme..Bohr effect
HE-06950	Metabolism
HE-07027	Hemoglobin..cell differentiation..chick embryo
HE-07057	Kidney disorders
HE-07100	Oxygen transport..fetus..human
HE-07234	Hemolysis..blood disorders..sickle cell anemia
HE-07281	Radiolabeled phosphorus..blood volume..liver cirrhosis..clinical study
HE-07285	Kidney circulation..albumins..cell volume..kidney..dogs
HE-07326	Lipids..cell membrane..clinical study
HE-07346	Cell age..hemoglobin..hemoglobin-S..hemoglobin-C..hemoglobin-F..metabolism
HE-07377	Radiolabeled chromium..plasma..radiolabeled iodine..blood circulation dynamics..blood volume..clinical study
HE-07401	Erythrocyte ghosts..cell membrane..surface properties..electrophoresis..electron microscopy..polarization optics
HE-07416	Cell age..altitude..llamas..alpacas..vicunas
HE-07429	Phagocytosis..clinical study
HE-07449	Histochemistry..glucose-6-phosphate dehydrogenase..genetics..heterozygotes..research programs
HE-07467	Sodium..potassium..anesthesia
HE-07499	Anemia..clinical study
HE-07542	Cell age..cell volume..erythropoiesis..bone marrow..erythropoietin
HE-07549	Muscle..exercise..rabbits
HE-07616	Hemoglobins..hyperosmolarity..oxygen tension..temperature..hydrogen-ion concentration....sickle cell anemia
HE-07652	Membrane permeability..cell age..aging..immunology..animal..human
HE-07683	Erythropoietin..isolation-purification..chemical structure..animal..human
HE-07710	Amino acids..transport..human
